

Vangipurapu N V S D Mallikarjuna Rao

Hyderabad, India | +91-8897913089 | mallikarjunvnvsd441@gmail.com

Professional Summary

Results-driven NOC Support Engineer with 4+ years of experience in APM, NOC Operations and Production Support across Banking and Telecom domains. Skilled in monitoring and maintaining application, infrastructure, and network availability in 24/7 SLA-driven environments. Experienced in AWS cloud infrastructure monitoring, including EC2 instance health checks, CloudWatch alert monitoring, and basic troubleshooting of cloud-based services. Specialized in Dynatrace configuration including Management Zones, Alerting Profiles, Synthetic Monitoring, and Real User Monitoring (RUM). Experienced in incident triage, bridge call coordination, root cause analysis (RCA), and SLA-driven production environments. Strong focus on reducing alert noise, improving MTTR, and maintain production stability in enterprise environments.

Technical Skills

Monitoring and observability Tools: Dynatrace, SolarWinds, Auvik, N-Able, Extreme IQ cloud, OMI, Smarthub

Monitoring: Synthetic Monitoring (HTTP & Browser), Real User Monitoring (RUM), Infrastructure Monitoring, Network Monitoring

ITSM Tools: ServiceNow, JIRA, BMC Remedy ITSM, Connectwise

Operating Systems: Linux/Windows (service restarts, log analysis, port validation)

Cloud: AWS EC2, S3, IAM, VPC, ALB/NLB, CloudWatch, Route53, Azure (Fundamentals)

Concepts: Incident Management, Problem Management, RCA, SLA/KPI Tracking, ITIL

Deployment & DR: Release validation, DR drills, Patch support

Professional Experience

Technical Engineer | Hitachi Systems India Pvt. Ltd., Hyderabad | August 2025 – Present

- Led RCA investigations for P1/P2 incidents, reducing repeat occurrences and improving MTTR.
- Monitored 100+ applications and infrastructure components using Dynatrace and AppDynamics in SLA-driven environments.
- Configured Management Zones and Alerting Profiles to improve environment segmentation and proactive alerting.

- Created and maintained Synthetic Monitors (HTTP & Browser) and analysed RUM data for end-user performance visibility.
- Performed proactive health checks and dashboard validations to detect anomalies early.
- Troubleshoot Linux-level issues including service restarts, log analysis, and connectivity validation (port checks).
- Actively participated in bridge calls, collaborating with DevOps, QA, and Infrastructure teams for faster resolution.
- Supported DR drills, patching, release validation, and deployment activities.
- Mentored new team members and contributed to SOPs and knowledge base documentation.

MSG Alert Support Specialist | New Era Technology | June 2025 – July 2025

- Proactively monitor network and infrastructure health using Auvik, SolarWinds, and N-able, ensuring optimal system performance and minimal downtime.
- Perform real-time alert handling and triaging for network-related issues including node down, high latency, bandwidth spikes, and hardware failures.
- Utilize ConnectWise ticketing system for incident management: create, track, update, and resolve tickets in line with SLA commitment.
- Created SOPs and documented recurring issue solutions to improve team efficiency.
- Coordinate with ISPs and hardware vendors for device replacements and technical escalations.
- Participate in on-call rotations and incident bridge calls to address urgent production-impacting alerts.
- Continuously analyse alert trends and recommend improvements to reduce false positives and enhance monitoring effectiveness

Systems Engineer | CGI, Bengaluru | Nov 2021 – June 2025

- Managed real-time application, infrastructure and Network devices across Telecom domains.
- Handled incident triage, escalation, and resolution ensuring SLA compliance.
- Contributed to RCA discussions and collaborated in major incident bridge calls.

- Supported deployment monitoring, patching activities, and release readiness validations.
- Monitored and maintained cloud infrastructure on AWS, ensuring availability and performance of EC2 instances, storage, and networking components.
- Utilized AWS services such as EC2, CloudWatch, and S3 for system monitoring, log analysis, and alert management.
- Assisted in troubleshooting AWS infrastructure issues related to instance health, connectivity, and resource utilization
- Creating Vendor cases for Hardware related issues and escalating as per the SLA requirement.
- Monitored network traffic, system logs, and server performance using NOC dashboards, identifying potential bottlenecks, vulnerabilities, and other performance issues, providing recommendations to prevent future incidents.
- Managed NOC-related monitoring tasks, including proactive system and network health checks, alert validation, and coordination of incident escalation for both Linux systems and network infrastructure
- Escalating issues to ISP and raising tickets with ISP.
- Maintained accurate shift handover documentation, Standard Operating Procedures (SOPs), Handover of Vendor cases to next shift and NOC-specific workflows for seamless knowledge transfer, ensuring efficient monitoring and incident resolution across shifts.

Project Highlights

Dynatrace Icards – ICICI Bank (Hitachi)

Tools: Dynatrace,

Responsibilities: Dashboard creation, alert configuration, health checks, incident management, RCA involvement.

NOC Operations – Corp & US-19

Tools: SolarWinds, ConnectWise, Auvik, N-able, Cisco SD-WAN portal,

Responsibilities: Infrastructure and Network monitoring, incident escalation, SOP creation, Handling ISP cases and escalations

NOC Operations – Brookdale Senior Living

Tools: SolarWinds, ServiceNow, SR360, Extreme IQ Cloud,

Responsibilities: Infrastructure and Network monitoring, incident escalation, SOP creation, Handling ISP cases and escalations

Common Operations – Bell (Telecom Domain)

Tools: Dynatrace, SolarWinds, OEM, SmartHub, PAM,

Responsibilities: Infrastructure and application monitoring, incident escalation, SOP creation, deployment monitoring, and support, Handling Vendor cases and escalations

Certifications

Azure Fundamentals AZ-900

Azure certified Network Engineer AZ-700

Education

B.Tech – Mechanical Engineering

Vasireddy Venkatadri Institute of Technology, Nambur – 2021
